

UNDERWATER SHIP SERVICES
PORT REPAIR & CONSTRUCTION
CHARTERING

80% of all the projects are carried out outside the Baltic Sea region

~300 employees and specialists

1600 ships served annually

4500 projects worldwide

5000 m² of warehouse and workshop facilities

5M EUR general liability insurance

HISTORY AND EXPERIENCE

Based in the northernmost ice-free port on the Eastern coast of the Baltic Sea, GARANT DIVING company is a part of GARANT GROUP international holding. Underwater works unit started its journey in 1990 as a local team of divers servicing seagoing vessels.

Throughout 30 years, together with our partner network we became a division of international subsea technical support with certified divers, experienced engineers and technicians, specially outfitted fleet and unique equipment.

Trained divers supported by fully equipped mobile diving stations carry out underwater services at the most convenient location. Having a long-term expertise, we are engaged in complex hydro construction works of the port infrastructure and seabed dredging projects.

By operating modern research vessels, GARANT DIVING provides high quality oceanographic research with relevant hydrographic and geophysical services to support international offshore wind farms' development projects.

UNDERWATER SHIP MAINTENANCE & REPAIR

Regular underwater ship maintenance helps keep your vessel regular speed, maintain schedule and minimize fuel consumption. We work 24/7 to respond quickly to your call and get to any port on the planet. Our internationally certified specialists strictly follow safety standards and carry out the following:

- Vessel class inspection (In-water survey/UWILD)
- Damage survey
- Hull cleaning & propeller polishing
- Hull repair (class approved)
- Rudder repair
- Wet welding & cutting
- Propeller repair & re-balancing
- Propeller replacement / installation PBCF
- Azimuth thruster replacement
- Tail shaft/ rudder clearance measurements
- Search and recovery of lost chains, anchors and steel objects
- Blanking of sea chest
- Emergency ships salvage
- Photo and video reporting

GUSPA

In order to assist your vessels on time and around the world, we have established GUSPA – Global Underwater Services Provider's Alliance. Collaborating with reliable and professional partners from the Netherlands, Poland, Spain, Estonia, Latvia, Israel, Singapore, Belgium, USA, Canada, and Brazil, we will take care of your vessel where you need it most.

PORT REPAIR & CONSTRUCTION

Trained specialists operating a crane vessel, tugboats and supported by professional divers are actively engaged in the following activities:

- Port dredging works
- Berth construction & reconstruction projects
- Port and dock underwater structures repair & maintenance
- Underwater cables installation
